## Bio Basics

### Guaranteed Analysis:

Available Phosphate (P2O5).....5.00%  
Calcium (Ca) .....7.00%  
Sulfur (S).....1.30%  
Iron (Fe).....1.20%

**Derived from:** Humic shale, soft rock phosphate

### ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

25% Humic Acid derived from humic shale ore.

**Live Earth's Bio Basics is a homogenous blend of humic shale and soft rock phosphate made without fillers, binders or other additives. It is suitable for use on all turf, ornamentals, and crops, and treating soils that are deficient in phosphate and calcium.**

**Bio Basics contains phosphate, a major component of root development. As such Bio Basics can be used a starter fertilizer and where it is desired to improve root growth. Additionally, the humic acid contained in Bio Basics may also aid in the uptake of micronutrients.**

**Contains No Sewer Sludge or animal waste/byproducts and can safely be used in vegetable gardens.**

**LOT#385026**

**For professional & homeowner use. Safe for use on all turf, vegetables, flower gardens, and ornamentals.**

### Apply Only as Directed

#### Turf:

- Apply up 25-50 lb per 1,000 sq. ft.
- Water in after application.
- Product may take several irrigation cycles to completely dissolve, use accordingly on non-aerified putting surfaces.
- Apply quarterly or as needed.

**Gardens and New Turf Construction:**  
25-150 lbs per 1,000 sq. ft., till into soil prior to planting.

**Crops:** Per soil analysis or as recommended by an agronomist.

#### Trees & Shrubs :

- Apply 10-15 lb per 1,000 sq. ft.
- Water in after application.
- Apply 3 times per year or as needed.

Note: Bio Basics does not contain soil microbes.
